

Can Home Be Squashed?

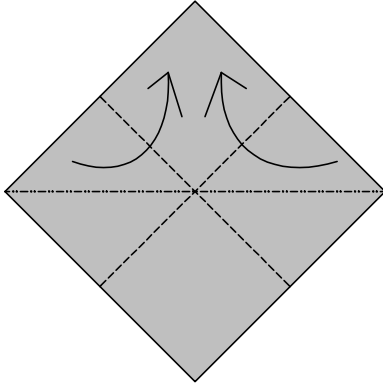

© 2020 Sy Chen

Design on 4/22/2020 and diagrammed on 4/23/2020

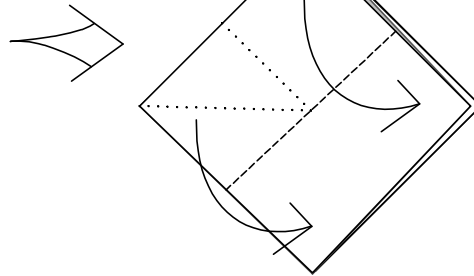

15 cm square makes a 7.5 cm wide house shaped model.

This design is inspired and challenged by the online post from Sara Adams. It is simplified and adapted from my "Can Love Be Squashed?" design.

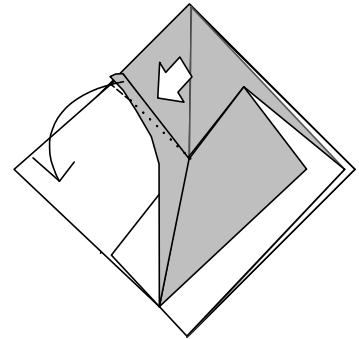

1. Start from a square with the color side facing up. Make a preliminary base.

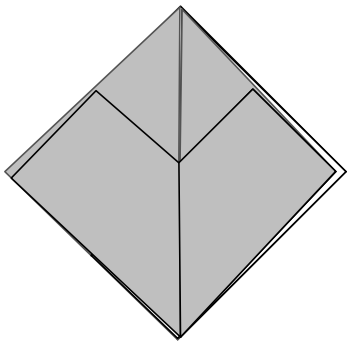

2. Fold the top layer down while squash the folded edge beneath.

3. In-progress.

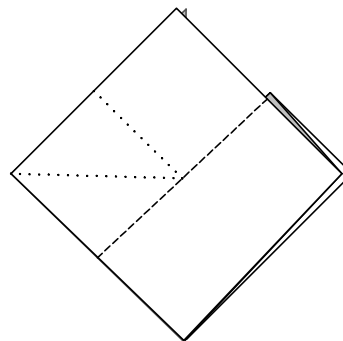

4. Flattened piece.

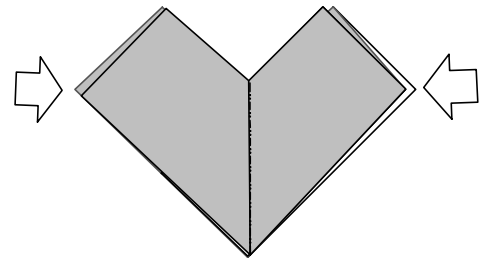

5. Repeat steps 2-3.

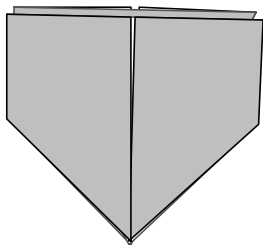

turn over

6. Finished heart shape; Squash.

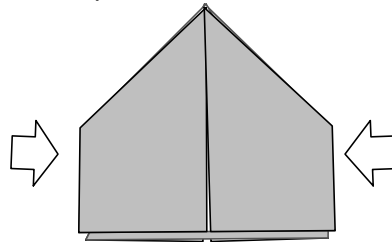

7.

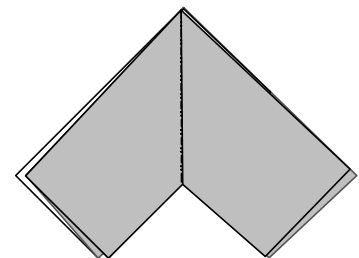

8. The completed house; Squash.

180°

9. The upside down heart.

10. House-Heart transformation by squashing.
